

LOW LOSS CUTS EXTENSION

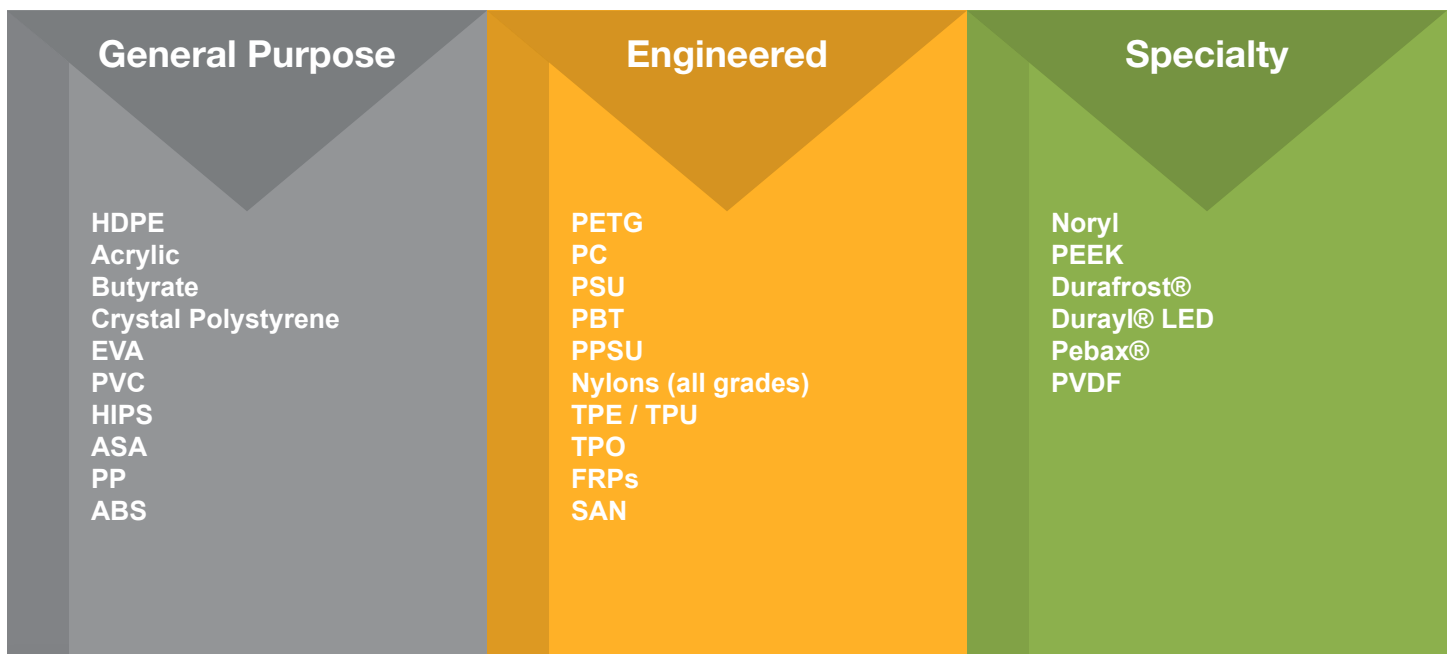

Our First Priority is You

At Pexco, customer satisfaction is our number one priority. For over 50 years, we have been developing solutions for your plastics needs across a broad range of markets, earning the trust and confidence of our customers along the way. We are proud to be considered a trusted advisor and are dedicated to creating innovative solutions that bring your custom products to market on time and within budget.

Custom Extrusion is Our Specialty

Custom plastic extrusion is the core of what Pexco does. Our comprehensive suite of manufacturing processes and expansive manufacturing footprint across the US and Mexico, coupled with our extensive range of material expertise, give us the options and flexibility to tackle the most complex plastic challenges.

Pexco processes over 500 different grades of resins, ranging from commodity grade to high-performance engineered thermoplastics.

Experience that is Proven

Our expertise in the engineering, design, manufacture and delivery of custom plastics has been proven across a wide range of industrial applications. From industrial equipment, lighting, consumer products, traffic safety and transportation to filtration, privacy fence, building products and construction, we stand ready to put our experience to work for you.

Ready to Meet Your Needs

Whether big or small, standard or highly complex, our team of engineers has your plastic manufacturing needs covered with a broad range of extruded plastic engineering, design and fabrication services.

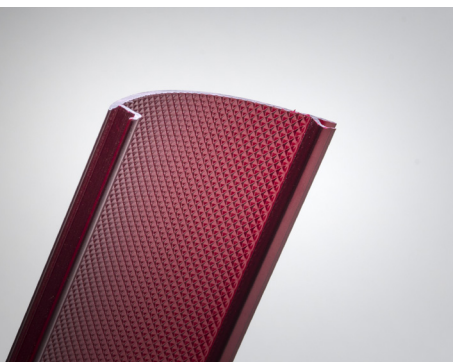

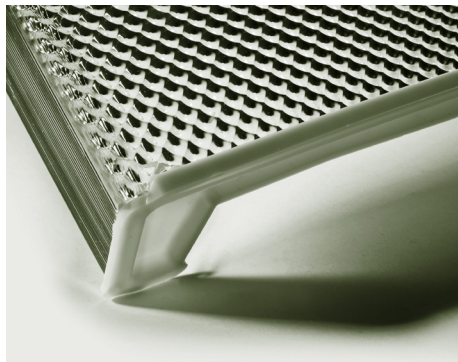

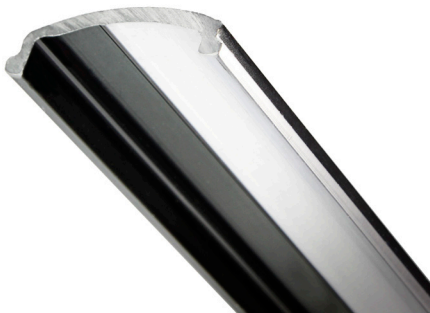

Included in our core competencies are:

- **Extruded profiles and tubing**
- **CNC machining**
- **Post-process fabrication**
- **Assembly and packaging services**

Even though we are the largest custom profile extruder in North America, we are committed to being easy to work with, flexible and attentive to the individual needs of our customers. With a manufacturing footprint that stretches across the United States and Mexico, and a strong team of engineering and production specialists, we are able to provide consultation, design, and production solutions for all your end-use challenges.

Commitment to Quality

We aim to exceed customers' expectations and excel in quality through our commitment to continual improvement. To accomplish this, Pexco has developed policies and procedures to provide a framework to establish and review quality objectives to ensure the effectiveness of the quality management system. We are committed to satisfy all applicable requirements upon us in this endeavor.

Headquartered in Johns Creek, GA, Pexco operates a comprehensive network of manufacturing plants across North America, including our Engineering Center of Excellence, with multiple extrusion lines devoted exclusively to new product development.
