We'll help you get there.

Aerospace

For over 30 years, Pexco has been serving the aerospace industry's unique needs. Our ability to manufacture solutions to meet our customers most demanding requirements has made Pexco the go-to supplier for aircraft plastic extrusions and fabrications. Our customers, big and small, know Pexco as a trusted supplier and an invaluable contributor to design projects.

We hold ourselves to a higher standard.

Long recognized as the leading supplier of plastic extrusions and fabrications by Boeing and many other aerospace OEMs, we provide quality, custom products that meet the most demanding standards. Our proven, AS9100 approved processing capabilities ensure that all of our products are manufactured correctly and efficiently. With applications ranging from simple bump strips to complicated structural assemblies, Pexco is well suited to produce to your requirements regardless of the job's size or complexity.

Our capabilities include:

Extrusion

- Aerospace grade resin specialization
- ABCO, Ultem, Radel, Nylon, Polycarbonate, etc.
- Unrivaled dimensional stability
- Co-extrusion capabilities
- In line fabrication
- Custom color matching
- All tooling is designed, produced, and developed in-house
- Quick response to design changes, new parts, fluctuations in demand, production issues, etc.

Fabrication

- Close tolerance cutting
- Water-jet
- Milling
- Drilling
- Countersinking
- Heat forming
- Sand blasting
- Assembly
- Welding
- Punching
- Ability to process raw extrusions as well as many stock materials including rod, sheet, plate, etc.

Other offerings include:

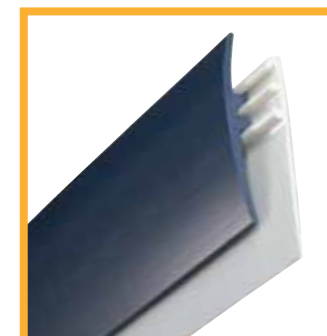

- Design and material selection consultation
- Licensed and FAA-PMA approved replacement parts to serve the aftermarket
- Unrivaled customer service and quality
- Ability to process/procure other materials and parts including phenolics, nylons, teflons, tapes, foams, etc.

First-class service.

At Pexco, we're dedicated to 100% customer satisfaction. We achieve this by providing quality products, cost savings and a one-of-a-kind experience.

Our locations across North America allow us to enhance productivity, ensuring on-time delivery and lower transportation costs. Always delivering products that fit your needs. Whether that's JIT, Min/Max or standard production runs. We also supply committed regional sales and technical support teams to provide the highest customer satisfaction in the industry.

Lastly, we offer design assistance for materials, structural properties and engineering, and have a long history of interior design on many major airliners. It's all in an effort to provide you with the highest quality solutions that can satisfy any need.
