### **For Immediate Release**

### **Invisi-Base Enhancements Provide Additional Applications & Simplified Installation**

**Tacoma, WA** - Davidson Traffic Control Products has announced the re-designed FG 300 Invisi-Base, a flush mount base for their popular FG 300 Series Channelizer posts.

The Invisi-Base provides a neat profile in applications where effective channelization is required without the height of a raised base or where the posts need to be seasonally removed from the roadway. Flush mount bases are desirable in applications with high pedestrian traffic where a traditional raised base might not be desirable. In climates where channelizer posts need to be removed to accommodate winter snow plow operations, it is a quick process to remove the posts and replace the Invisi-base summer cover with a winter cover. Once the winter cover is installed a level road surface is the result.

Davidson redesigned the Invisi-Base to provide easier installations and quicker replacement of damaged posts in the field. The plate covers which originally used traditional screws now use ¼ turn fasteners to speed removal of summer or winter covers. Three tabs have been added to the side of the Invisi-base to stabilize it during installation to ensure a level placement.

The Invisi-Base also allows the retrofit of NTPEP tested channelizer posts like the highly durable Davidson FG 300 EFX and UR into existing recycled rubber curb sections. The outside walls of the Invisi-Base are tapered to simplify installation into rubber curb sections. The Invisi-Base can be glued into the cored out holes in the rubber curb for a more durable upright post.

Davidson Traffic Control Products is part of Pexco LLC, a global manufacturer of various plastic products with the advantage of years of technical and engineering expertise. Davidson Traffic Control Products manufacture a unique family of Type I, II & III Barricades, Channelizer Posts, Curb System, Work Zone Pavement Markers, Flexible Delineator Posts, Reflectors for Barrier Walls and Guardrails, Snow Poles and many adhesive products that have gained worldwide acceptance.
