

Where Ideas Take Shape

Who we are:

- Largest custom plastic extruder in North America
- Unsurpassed knowledge and expertise
- Eleven sites with wide market reach
- Materials from commodity to engineering resins

Expertise:

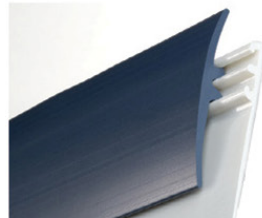

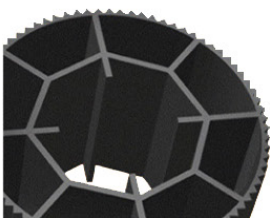

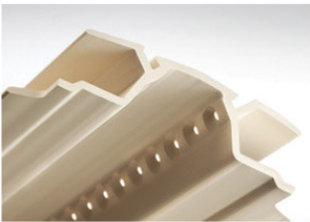

- Thermoplastic profile and tubing extrusion
- Lean manufacturing
- Co-extrusion, tri-extrusion, material blends
- Fabrication & value-added conversion
- Machining & sub-assembly

Markets Include:

- Industrial
- Medical & life sciences
- Consumer & commercial
- Aerospace & transportation
- Building & infrastructure

- Concept design
- Rapid prototyping
- Die making
- Global sourcing
- Tight tolerance precision

Custom solutions for the challenges you face

■ Industrial

Application of advanced extrusion and material technology for aerospace, traffic safety, lighting, infrastructure, transportation, energy, and more

■ Life Sciences

Tubing and profile applications in specialty healthcare, medical device, environmental, agricultural, and food & beverage segments

■ Commercial

Advanced extrusion and material technology to retail point-of-purchase, fence and landscape, and consumer appliances
