

# Safety Top Cap-LITE®

**Safety Top Cap-LITE®** is a lighter and more affordable version of our premium Safety Top Cap, but with a new tear drop shape. It provides protection against bodily injury by covering the exposed knuckles or barbs on top of a chain link fence. It also increases visibility of the fence for player safety while acting as a decorative trim piece to enhance any galvanized or colored chain link system.

Comes conveniently cut in 8' lengths, and unlike some economy fence cap products, requires no special tools for installation.

Don't settle for competitive designs and styles that pose an installation challenge, do not blend with the natural contours on top of the fence, or offer our impressive long-term warranty.

## Design

Durable and flexible plastic in an open tubular teardrop shape.

## Security

Resist vandalism by using the zip ties to easily attach the Safety Top Cap-LITE to the fence.

## Installation

Simply "snap" over the top of the fence and lock to the wire mesh with plastic zip ties (included with each package) through the four (4) pre-drilled holes on each piece.

## Multiple Uses

Primarily used in our safety yellow color for baseball outfields. This product is also growing in popularity at athletic fields, parks, playgrounds and recreational facilities throughout the country.

## Colors\*

white

green

brown

black

red

royal blue

safety yellow

\* Exact representation of colors in printing is difficult. Please refer to actual color samples for final matching.

## Product Specifications

Cap Height	Cap Width	Cap Length	Caps Per Bag	Approx. Coverage Per Bag	Zip Ties Per Bag	Bag Weight
4"	2½"	8'	10	80 linear feet	40	18 lbs.

### Materials

Safety Top Cap-LITE is extruded from High Density Polyethylene (HDPE), color pigments and ultra violet (UV) inhibitors, specifically designed to retard the harmful effects of the sun and lengthen the life of the product.

### Durability

This product is designed to endure high impact, resist the harmful effects of the sun, and to withstand severe weather conditions such as: Salt water, sand, road dirt, most acids, alcohol, alkaline, ammonia, petroleum distillates, and common environmental pollutants.

### Maintenance

Pressure cleaning of surface contaminants is quickly accomplished with plain water.

### Limited Warranty

Pexco's Safety Top Cap products carry a 25-year, pro-rata warranty against breakage under normal conditions. Write Pexco for full warranty information.

### HDPE Technical Properties

Property	Value
Melt Index	(.6) A low melt index indicates improved stress and crack resistance.
Density	(.957) Polyethylene ranges anywhere from .914 to .960 in density. A higher density yields maximum stiffness without becoming overly brittle.
Minimum Temp.	(-76° F) Polyethylene stays flexible even at temperature extreme.
Maximum Temp.	(250° F) Polyethylene does not distort reaching this temperature.
Tensile Strength	(3,700 psi) Material will not suffer distortion at lesser loads or impacts.
