

PEXCO

FENCE VISIBILITY MARKERS

Specifications

Better Design:

Open socket on top edge allows the marker to flutter effortlessly in a breeze.

Easy Application:

The upturned lip allows for quick "snap-on" installation.

Faster Installation:

More miles can be installed with less effort.

Makes wire fences more visible and reduces fence strikes and collisions.

Pexco's Fence Visibility Markers were initially designed for the protection of Sage Grouse in the Western U.S. These markers drastically reduce strikes and collisions with wire fences. Uses for the markers have grown across the country to guard against accidents with fences and motorcycles, ATVs, snowmobiles as well as other outdoor recreational vehicles.

COLORS:

White Reflective

Black Reflective

White Non-Reflective

Black Non-Reflective

Specifications

INCREASED VISIBILITY OF FENCE:

Without being visually objectionable to landowners.

AFFORDABLE:

Markers are cost-effective enough to mark many miles of fence line.

UV STABILIZED AND DURABLE:

Providing years of worry-free service in the field.

OPTIONAL REFLECTIVE SHEETING:

Fluorescent yellow-green, yellow, and orange reflective sheeting increases visibility in low light and winter conditions.

HIGH CONTRAST COLORS:

These long-lasting colors and styles are available:

- White Reflective
- Black Reflective
- White Non-Reflective
- Black Non-Reflective
