Lot Base*

— Made in the USA —

A Cost Effective, Plastic Parking Lot Sign Post and Base, Perfect for a Variety of Parking Facility Applications

A Quick and Easy Parking Lot Sign System

The Davidson sign post system allows for rapid installation of a lightweight, durable plastic sign post. Less expensive than steel, and far more visible, our system takes only minutes to install and will last for years. These posts will bend when struck, return to vertical and won't damage vehicles like steel posts.

The **X-Tube Post** is a white, 1.75" square post supported by two internal, corner to corner reinforcing cross beams. Made from UVstabilized polymers,

the posts offer superior impact resistance and withstand all weather conditions.

Our **Y-Tube Post** is also a 1.75" square post. It's made from an engineering thermoplastic resin and is available in a rainbow of colors for enhanced visibility. The posts are UV-stabilized and withstand all weather conditions.

Both the X and Y-Tube Posts are available up to 8 feet in length and come pre-drilled for installation of 12" x 18" signs. They are quick and easy to install, lightweight and *maintenance-free!*

Our **new** Parking Lot Base is created from a high impact resistant UV-stabilized resin. They are designed to conserve space and reduce trip hazards. The plastic bases will accept both X and Y-Tubes or 1.75" square steel tube, upright sign posts and will lock securely in place with a simple bolt or quick release pin.

Options for Easy Installation:

Epoxy:

Two part roadway epoxy.

Bolts:

4 bolts, one in each corner of the base in either concrete or asphalt.

Thermoplastic Adhesive:

Thermoplastic adhesive pads.

Sign posts are secured to the base with a locking pin system. Use either a quick release pin or bolt and a nyloc nut.

Applications for the X & Y-Tube

- Post and Parking Lot Base:
- Handicap Parking Locations
- Parking Lots & Public Facilities
- Special Event Signage
- Employee of the Month Signs
- Temporary Full Lot Signs
- Custom Signage
