

FTSTR DELINEATORS

FLAT TOP STAR GROUND MOUNT DELINEATORS

The FTSTR series are general-purpose delineators made from weather resistant **polypropylene**, designed and built to meet MUTCD standards and meet Standard NTPEP Test protocol. This is a perfect delineator for use on roadway shoulders.

PEXCO

FTSTR DELINEATORS

The FTSTR series are general-purpose delineators made from weather resistant polypropylene, designed and built to meet MUTCD standards and meet Standard NTPEP Test protocol. This is a perfect delineator for use on roadway shoulders. Steel anchor provides a reusable anchor point in the event replacement is needed. The post is 2.25" in diameter, sold as a complete kit consisting of the delineator, hinge, and steel anchor. No "special tools" are needed to install. The star hinge is an original Pexco design and is compatible with the square tubing being implemented in roadways by many DOTs around the USA. These pertinent details are what make the FTSTR the most efficient choice for your application.
