

PEXCO

DP 200 CHANNELIZER POST

360 DEGREES OF DURABLE DELINEATION

The Pexco family of channelizer posts increase visibility and improve safety

Channelizer posts save lives by properly directing traffic and reducing the chance of accidents in many kinds of locations. Our posts are **highly visible, day and night**. They clearly delineate driving lanes with bright colors and reflective sheeting. To reduce the risk of accidents, place durable polyurethane channelizer posts at critical points along your roadways where safety hazards exist.

DP 200 Post

PEXCO

DP 200 CHANNELIZER POST

Maximum Visibility. Proven Roadway Protection.

The DP 200 remains extremely flexible, even at extreme temperatures and returns to an upright position after impact.

The DP 200 has been NTPEP tested and meets MUTCD requirements for channelizing devices, and meets the requirements of NCHRP 350 for Category 1 Devices.

Standard Surface Mount Base

50% recycled material — post held in place with 2 quick release pins. Mounts with butyl pads, bitumen, epoxy or anchor bolts.

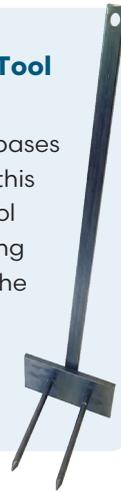

Available in yellow, white, fluorescent orange and black.

Spinner-style base with anchor cups available by special order.

Pin Removal Tool

Posts can be removed from bases with the use of this Pin Removal tool without removing the base from the roadway.

Benefits

- 3" Round Channelizer Post
- Durable thermoplastic polyurethane for impact resistance
- 360° of reflective visibility
- Stands up to extreme temperatures
- No metal parts to rust or seize
- UV stabilized
