

PEXCO

AVAILABLE OPTIONS AND APPLICATIONS FOR **T3B[®] BARRICADE** PLASTIC TYPE III BARRICADE PRODUCTS

Lightweight and Durable T3B

Type III barricades are an essential tool for keeping motorists safe in construction zones, emergency situations, and other areas where traffic needs to be redirected. These barricades provide clear guidance to drivers, and due to their large and highly visible design, they can help reduce the risk of accidents while helping keep workers safe on the job. Type 3 barricades are particularly effective at directing traffic around construction projects or other areas where road conditions may be hazardous.

T3B® BARRICADE

PLASTIC TYPE III BARRICADE PRODUCTS

Pexco uses durable high density polyethylene plastic panels and a modular design to create the T3B system. If the T3B System is subjected to minimal damage, the easily interchangeable parts speed repair of damaged units, which shortens turnaround time.

A complete T3B Type III Plastic Barricade includes:

- 8¼" wide flat panels make application of reflective sheeting simple and fast
- Factory-treated/sheeted panels create a reliable bond for reflective sheeting – not available on blanks
- Seven internal I-beams create a rigid, yet lightweight structure

Type III Barricade Options

Upright options:

- X-Tube lightweight square reinforced plastic upright
- 1.75" PSST steel upright
- 3.5" square poly-tube (special order)

Barricade foot options:

- 2" 14 gauge PSST foot
- 5' Angle Iron Powder Coated white foot
- "The Yeti" 40 lb recycled rubber foot

Hardware Options:

- Standard hardware includes bolts, washers and lock nuts
- Anti-theft hardware
- Quick-release pin
