

Hi-Viz ELD Reflector Installation Procedures

A) **Concrete Jersey Barriers**

- 1) Reflectors should be placed in dry conditions with temperatures 50° F and rising.
- 2) Concrete surface must be free of dust, dirt, oil and moisture. Note: below 50° F., atmospheric moisture may inhibit adhesion.
- 3) Prime the surface with primer (3M Spray # 80 or equivalent) prior to installation. Wait sixty (60) seconds until primer ceases to bubble to install reflector.
- 4) Remove all release paper from butyl adhesive on the base of the reflector.
- 5) Place reflector onto Concrete surface in a vertical orientation and apply pressure for 5 seconds.
- 6) Reflective surface must be placed towards oncoming traffic.

B) **Metal Barrier or Guardrail Surfaces**

- 1) Reflectors should be placed in dry conditions with temperatures 50° F and rising.
- 2) Surface must be free of dust, dirt, oil and moisture. Note: below 50° F., atmospheric moisture may inhibit adhesion.
- 3) Prime the surface with primer (3M Spray # 80 or equivalent) prior to installation. Wait sixty (60) seconds until primer ceases to bubble to install reflector.
- 4) Remove all release paper from butyl adhesive on the base of the reflector.
- 5) Place reflector onto surface in a vertical orientation and apply pressure for 5 seconds.
- 6) Reflective surface must be placed towards oncoming traffic.

C) **Limitations**

- 1) Insufficient pressure will not allow the adhesive to set. Adhesive pads can only be used once. Failure to install correctly can result in loss of the marker and adhesive.
- 2) Moisture on the roadway will inhibit bonding of the markers.
- 3) Roadway must be clean and dry prior to installation.
