Polychlorotrifluoroethylene Rods

PCTFE (Also referred to as Kel-F or Neoflon) is a fluoropolymer material that possesses outstanding strength and dimensional stability, with excellent chemical and radiation resistance. PCTFE, like other fluoropolymer materials, has superior flammability resistance. PCTFE has a wide temperature use range of -400 F to 380 F, is resistant to cold flow and has the lowest coefficient of thermal expansion of any unfilled fluoropolymer.

Features

- Excellent thermal strength
- Non-flammable
- Optical transparency
- High compressive strength
- Rigidity
- Excellent chemical resistance

Applications

- Seals and gaskets
- Aerospace
- Cryogenic systems
- Food processing
- Marine applications
- Valves and other components

Specifications

- **Temperature:** -400 F TO 380 F / -240 C TO 194 C
- **Resin:** 100% Virgin PCTFE
Daikin NEOFLON® M-400H PCTFE
- **Standard Lengths:** 6 FT / 12 FT
- **Certification:** ASTM D1439017 GROUP 1, CLASS 1, GRADE 3
FDA Compliant per 21 CFR177.1380
AMS 3650 (Lot Testing required for certification)
