

TRPM[®] FLEXIBLE CHIP SEAL MARKER

TEMPORARY CHIP AND SLURRY SEAL MARKERS

KEEP WORK ZONES SAFE FOR YOUR CREWS AND DRIVERS

Work zones create hazardous driving conditions for drivers. Each year thousands of people are killed in work zone related accidents. Improved road markings and safer application methods hold the promise of improved safety and reduced accidents.

TRPM CHIP AND SLURRY SEAL MARKERS **SAVE TIME, MONEY & LIVES**

Using TRPMs in a chip seal operation is a proven and effective practice. TRPMs provide positive guidance to drivers both day and night. TRPMs are visible at night up to distances of 400 feet, providing excellent delineation. An additional benefit of TRPMs is that they provide a reference point for paint crews during the re-stripping process. Simple to use "Stick and Stomp" TRPMs come with one or two clear plastic covers designed to protect the marker and reflective sheeting from asphalt spray or slurry products. These tough reflectors are very bright, resist cracking and peeling and provide superb visibility from long distances, giving the driver advance warning of the road.

Save Money and Time! Self Adhesive TRPMs Take Only Seconds to Install

In an era of decreased budgets and increased timelines, TRPMs provide an opportunity for enormous cost savings. Quick, simple placement reduces the time that your crew is exposed to traffic. TRPMs can be installed in only seconds by one worker with no special equipment, providing high profile delineation on freshly sealed roads prior to permanent striping. Our unique adhesive system keeps the flexible TRPM securely in place. When the roadway is ready, TRPMs precisely guide the crews who are responsible for installation of permanent striping. TRPMs are your smart choice for your chip and slurry seal projects.

Pexco's TRPMs provide everything you need for a successful chip seal project:

- **Visible** — continuous ribbon of reflectivity
- **Simple** — Highly visible, tough polyurethane marker body
- **Temporary traffic markings** that are visible both day and night
- **Effective and inexpensive** lane line delineation
- **Safety for workers** and less time spent in traffic zones
- **Factory-applied butyl pad** for reliable "Stick and Stomp" installations take only seconds making Pexco's TRPMs highly cost effective
- **Standard colors:** yellow and white
- **Available with single or double covers** and multiple staple configurations
- **High heat TRPMs** are available for hot-applied, rubberized asphalt chip seals
