

PCBM BARRIER REFLECTORS

HIGH IMPACT BARRIER MOUNT DELINEATORS

PCBM-12

To reduce travel times and ease congestion, agencies are creating "Managed Lanes" (a freeway-within-a-freeway) to move large numbers of vehicles in a small amount of roadway space. Lane separation is required when these managed lanes operate at a different speed than adjacent unmanaged lanes.

50mm Barrier Flex Tab

A flexible polyurethane marker mounts to moveable steel guardrail or median barrier walls for temporary or permanent installations. It features double-sided prismatic reflective sheeting and is available with or without factory applied adhesive pad. Also available in longer lengths.

PCBM-T12

This popular barrier mount reflector features a built-in polyurethane hinge that provides tremendous flexibility and impact resistance.

PCBM-T9

The hinged version of the PCBM-9 is designed for use on top of movable barrier systems.

Switch Blade

A more durable, visible, and resilient evolution of the traditional concrete barrier marker. Designed to increase barrier visibility, the Switch Blade features a high-reflectivity panel system engineered for long-term performance in demanding roadway environments.

PCBM-9

The most economical of Pexco's barrier mount reflectors, the PCBM-9 meets the minimum MUTCD requirements for reflectivity with 9 square inches of reflective sheeting. The PCBM-9 can be used for top or side mount applications.

PCBM BARRIER REFLECTORS

HIGH IMPACT BARRIER MOUNT DELINEATORS

Big Dog PCBM

The Big Dog utilizes 96 square inches of fluorescent orange prismatic sheeting to provide more brightness than any other barrier reflector. This extra large top-mount reflector was designed for work zones where additional brightness is critical for guiding traffic.

PCBM-15

Used for top-mount installations in heavy snow regions because the 8 inch height places the reflector above the snow on the barrier wall.

Little Dog PCBM

The hinged version of the PCBM-9 is designed for use on top of movable barrier systems.

PCBM-9HD

This centermount barrier reflector features either a single or double sided application of the HOT Dot and offers bright, impact resistant reflectivity where acrylic reflectors are traditionally used.

HOT Dots is a registered trademark of the Orafol Reflexite Corporation, Avon CT. All rights reserved.

Gator Jaws®

Our unique "Gator Jaw" hinge allows the T12 reflector to take an impact and spring back to its full, upright position. This reduces maintenance and provides for long-lasting delineation.

PCBM-L16

The PCBM-L 16 is designed to create delineation that is 48 inches above the roadway, as required by many states. Pexco's PCBM-L 16 is easily mounted on the top of a standard 32 inch barrier wall. The 3" x 12" reflector provides the same amount of visibility as that of our Flexi-Guide 400 and 500 roadside delineator posts.
